

Microlens Arrays & Diffusers

Cost-effective, high quality custom microlens arrays for demanding customer specifications.

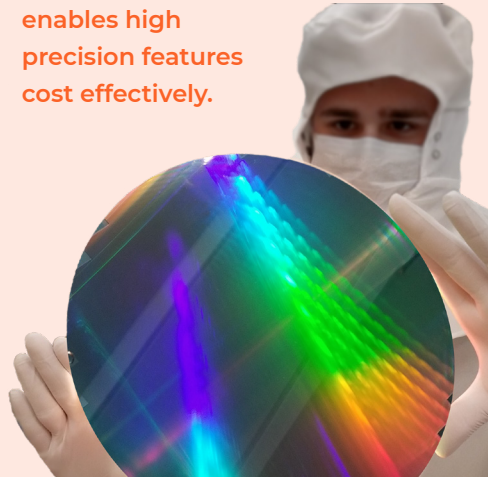

Transmission & Reflection Gratings

Custom, state-of-the-art, replicated diffraction grating-based solutions.

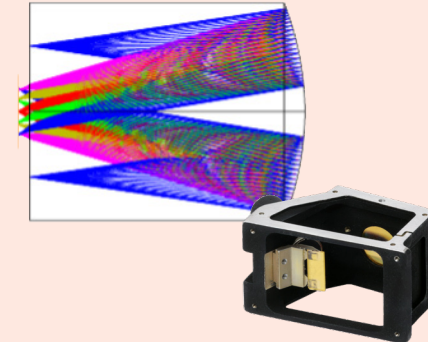

Wafer-Level & Large Format Optics

Wafer scale manufacturing enables high precision features cost effectively.

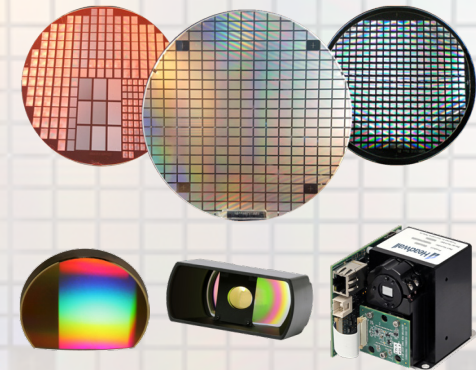

Optical Modules & Sub-Assemblies

Design and manufacturing of custom OEM optical solutions.

HOLOGRAPHIX[®]
A Headwall[®] Group Company

**Creating a Spectrum of
Optical Solutions
for
Precision OEM Applications**

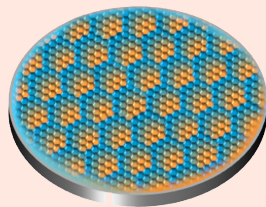

Collaborative Engineering enabling *Customer Innovation*

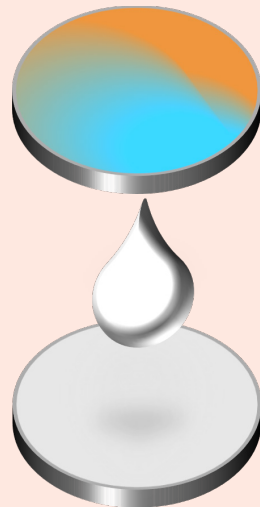

Holographix is the industry leader in nano and micro replication and original sinusoidal gratings.

Holographix works with OEM customers from design through volume manufacturing with expertise in optical design and opto-mechanics.

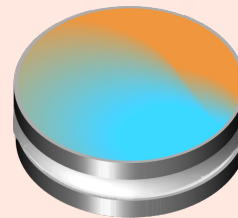

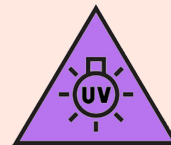

Our Replication Process

Step 1:
Master Structure (MLA,
Grating, DOE, Etc.)

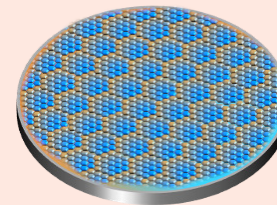

Step 2:
Align Master & Substrate +
Polymer Dispense

Step 3:
UV Exposure

Holographix nano/micro molding technology enables some of the most cutting-edge technological advancements

Step 4:
Replica (MLA, Grating,
DOE, Etc.)
